How the Game Works: Core Mechanics

To really master the skies, a gamer needs to first understand the fundamental mechanics of the game. While exact features can differ somewhat depending on the specific platform hosting the game, the universal framework stays consistent.

The Flight Phase

Once a round starts, the aircraft lifts off the runway and starts its ascent. As it climbs up, a multiplier counter begins ticking up-- starting at 1.00 x and continuing to increase. The longer the flight continues without occurrence, the higher the multiplier goes.

The Descent and Hazards

The skies are rarely clear. Along the flight path, numerous components appear that can either improve the player's score or too soon end the run. These can include beneficial tailwinds, fuel boosts, storm clouds, or unexpected elevation drops.

Cashing Out

The defining mechanic of Avia Masters is the component of danger versus reward. Players must decide the optimum moment to "squander" or protect their development. Wait too long, and an unexpected danger may crash the plane, resulting in a lost round. Squander prematurely, and gamers may lose out on massive multipliers.

Game Phase Description Gamer Action **Pre-Flight** Setting stakes or preparing the airplane for launch. Place initial specifications or start the round. **Climb** The aircraft removes; multipliers begin to climb. Monitor the flight course and enjoy the multiplier grow. **Mid-Flight** Browsing dangers, collecting bonus offers, and examining risk. Choose whether to hold on or secure the existing score. **Resolution** The flight ends either via an effective cash-out or a crash. Collect benefits and get ready for the next round.
