What Happens During the Assessment?

A private psychiatrist assessment is not a test to be passed or failed; rather, it is a collective discussion targeted at understanding the person's existing struggles within the context of their life story.

1. The Initial Discussion (History Taking)

The psychiatrist will start by asking why the person has sought assistance at this specific time. They will check out current symptoms, emotional wellness, and everyday functioning.

2. Medical and Psychiatric History

Since physical health and mental health are deeply intertwined, the psychiatrist will examine past medical conditions, present medications, and any previous psychological health diagnoses or treatments. They may also ask about family medical history to identify genetic predispositions.

3. Way Of Life and Social Context

Mental health is affected by environment and lifestyle. The specialist will likely inquire about:

- Employment or educational status
- Support systems (household, good friends, partner)
- Lifestyle aspects (sleep patterns, diet plan, workout, compound use)
- Any recent major life stress factors or trauma

4. Mindset Examination (MSE)

Throughout the discussion, the psychiatrist will informally assess the person's psychological state. This includes observing mood, affect, believed procedures, speech patterns, and cognitive function (such as memory and concentration).

Getting ready for Your Appointment
