Understanding the Top Slot and Multipliers

Before every spin of the primary wheel, a smaller sized two-reel slot device located straight above the wheel-- called the **Top Slot**-- spins concurrently.

- **How it works:** The Top Slot generates one random wheel sector (a number or a reward game) and sets it with a random multiplier varying from 2x to 50x.
- **The Result:** If the primary wheel arrive on the specific sector revealed in the Top Slot, the multiplier is used to that spin. If it is a number bet, the payout is increased. If it is a bonus game, the multipliers within the bonus round are enhanced appropriately.
