1. Coin Flip

The easiest and most frequent benefit round. The host steps up to a maker that flips a coin with a **Red** side and a **Blue** side.

- Before the flip, random multipliers are designated to each side of the coin.
- The coin is instantly turned, and whichever side lands face-up figures out the winning multiplier for the getting involved gamers.

2. Money Hunt

This changes the screen into an enormous interactive shooting gallery including a screen with **108 random multipliers**.

- The multipliers are concealed behind numerous signs (like a cactus, target, chef's hat, and so on) and after that mixed.
- Gamers are provided a crosshair to objective and fire at a sign of their option before the timer goes out.
- Once time ends, all signs reveal their covert multipliers, and gamers receive the multiplier representing the target they shot.

3. Pachinko

Inspired by the standard Japanese arcade video game, this bonus round takes location in front of a large physical wall filled with physical pegs.

- At the bottom of the wall are numerous multiplier zones, together with an unique "**DOUBLE**" zone.
- The host drops a puck from the top of the wall. As the puck bounces arbitrarily down through the pegs, it ultimately lands in one of the multiplier slots at the bottom.
- If the puck arrive on "DOUBLE," all multipliers on the board are doubled, and the host drops the puck again for an even bigger prize.

4. Crazy Time

The ultimate bonus round takes gamers behind a red door into a vibrant, virtual, Alice-in-Wonderland-style world including a gigantic 64-segment wheel.

- Gamers need to pick among 3 flappers (Green, Blue, or Yellow) at the top of the wheel.
- The host presses a huge red button to spin the wheel.
- The wheel features huge multipliers, "DOUBLE," and "TRIPLE" sectors. If a flapper arrive on a double or triple, all multipliers on the wheel are multiplied accordingly, and the wheel spins again. This can repeat up until an incredible **20,000 x max multiplier** is reached.

Strategies and Approaches for Players

- **The Bonus Hunter Strategy:** Placing smaller sized wagers exclusively on the four reward rounds (Coin Flip, Cash Hunt, Pachinko, Crazy Time). This approach accepts frequent dry spells in exchange for the possibility to take part in the video game's highest-paying rounds.
- **The Balanced Approach:** Spreading bets throughout both numbers and bonus rounds to guarantee a mix of constant gameplay and access to high-value reward features.
