Before diving into the specifics of Avia Masters, it helps to understand the underlying genre. Crash games are a contemporary design of online wagering and arcade-style entertainment. Unlike standard video games with predetermined outcomes determined by intricate reel setups, crash games focus on a single, central mechanic: **an increasing multiplier**.

In a typical crash game:

1. Players place a wager before the round starts.
2. A multiplier starts at **1.00 x** and climbs up in real-time.
3. An object (in this case, an airplane) takes flight, and the multiplier increases the longer it stays in the air.
4. The item can "crash" or fly away at any unforeseeable minute.
5. Players need to squander *before* the crash to secure their profits increased by the current rate. If the item crashes before a cash-out, the wager is lost.
