What is Online Limbo?

Limbo is a fast-paced, multiplier-based gambling establishment game. Originating in the crypto-casino sector, it is heavily inspired by traditional Crash games, but with a structured twist. Instead of watching a rocket or a line ascend on a chart and attempting to squander before it crashes, Limbo players just pick a target multiplier and press "Bet."

The game's algorithm then creates a random number. If the created number is equivalent to or higher than the player's picked target multiplier, the bet wins. If it falls short, the bet loses.

The name "Limbo" uses the timeless limbo dance idea: *How low can you go?* Or, in the case of multipliers, *How high can you aim?* Players can usually target multipliers varying from a modest 1.01 x all the way approximately a staggering 1,000,000 x, depending on the particular gambling establishment's limitations.

2. **Choose a Target Multiplier:** The player inputs their preferred winning multiplier (e.g., 2.00 x, 10.50 x, or 500x).
3. **Examine the Win Chance:** As the target multiplier changes, the game instantly determines the mathematical likelihood (Win Chance) of striking that multiplier.
4. **Roll/ Spin:** The player clicks the bet button.
5. **The Result:** The system reveals the created multiplier. If it satisfies or exceeds the target, the payment is calculated immediately (Bet Amount £ \ times £ Target Multiplier).
