4. **The Winner:** At the end of all rounds, the gamer (or group) who has built up the highest total monetary value of skins wins **all** the products dropped in the battle-- including those opened by challengers.

If luck is on a player's side, they can stroll away with a stock worth tremendously more than their initial buy-in. If luck fails, they lose whatever. It is this high-risk, high-reward dynamic that drives the immense popularity of the format.
