Security is paramount, specifically for children sleeping on the leading bunk. Vital functions include:

- **Guardrails:** The leading bunk ought to include continuous guardrails on all 4 sides (or at least firmly anchored rails covering the length of the bed with a little opening for the ladder).
- **Sturdy Ladders:** Angled ladders with handrails are much simpler and safer to climb than vertical, built-in sounded ladders. Staircase bunks provide the safest climbing option.
- **Weight Capacity:** Always inspect the manufacturer's weight limits for both the leading and bottom bunks.

3. Ceiling Height
