### How a Round of Crazy Time Works

Each and every single round of Crazy Time follows a structured, fast-paced sequence:

- 1. The Betting Phase:** Players are given a restricted timeframe (generally around 15 seconds) to position their chips on several of the offered wagering spots on the virtual layout. Gamers can bank on numbers, reward rounds, or a mix of both.
- 2. The Top Slot Spin:** Simultaneously while bets are being placed, a two-reel slot device placed directly above the main wheel spins automatically. The left reel reveals a bet area (number or bonus), and the best reel

exposes a multiplier (varying from 2x as much as 50x). If the bet spot and multiplier align, that multiplier is applied to the segment for the upcoming spin.

3. **The Main Wheel Spin:** The live host spins the physical wheel.

4. **The Outcome:** When the wheel pertains to a total halt, the pointer suggests the winning sector.

- If it lands on a **Number**, all players who bank on that number receive a payment according to the chances, increased by any Top Slot multiplier if appropriate.
- If it lands on a **Bonus Game**, the video game transitions to a different, immersive bonus round.

## Dive into the Four Bonus Rounds

The piece de resistance of Crazy Time is certainly its 4 bonus offer functions. These minigames use the most significant win potential and transportation gamers into completely different virtual environments.

### 1. Coin Flip

- **Frequency:** 4 sections on the wheel.
- **How it works:** A simple coin with a red side and a blue side is turned by a mechanical flipper on the screen. Before the flip, random multipliers are appointed to both the red and blue sides. Whichever side lands face up wins for the gamer. If the multipliers are low, a "Rescue Flip" can in some cases be triggered for a 2nd opportunity at higher multipliers.

### 2. Money Hunt

- **Frequency:** 2 sections on the wheel.
- **How it works:** Players are presented with a massive screen displaying 108 random multipliers hidden behind shooting gallery targets (such as a bunny, a chef hat, a cactus, and so on). A countdown timer begins, and each gamer must aim and fire a virtual cannon at the target of their option. When time expires, all targets expose their covert multipliers, and players collect the multiplier related to the target they selected.

### 3. Pachinko

- **Frequency:** 2 sections on the wheel.
- **How it works:** Inspired by the traditional Japanese arcade video game, players are taken to a glowing Pachinko wall filled with pegs. The host drops a puck from the top of the board, and it bounces randomly down through the pegs before landing in among several multiplier zones at the bottom. If the puck lands in a "DOUBLE" zone, all the multipliers at the bottom double in value, and the puck is dropped once again for an even bigger payout.

### 4. Crazy Time

- **Frequency:** 1 sector on the wheel.
- **How it works:** This is the supreme perk round. The host walks through a red door into a surreal, vibrantly colored virtual world featuring an enormous virtual wheel consisting of 64 segments and 3 flippers (Green, Blue, and Yellow). Players select among the 3 flippers before the wheel is spun. The wheel can feature enormous multipliers, "DOUBLE," and "TRIPLE" sectors. If the wheel arrive on a double or triple worth, all multipliers increase, and the wheel spins once again, paving the way for the game's optimum payouts.
