How the Game Works: Core Mechanics

To truly master the skies, a gamer should first understand the foundational mechanics of the game. While precise functions can vary a little depending upon the specific platform hosting the game, the universal framework remains constant.

The Flight Phase

As soon as a round begins, the aircraft takes off the runway and begins its climb. As it climbs, a multiplier counter begins ticking up-- starting at 1.00 x and continuing to rise. The longer the flight continues without incident, the greater the multiplier goes.

The Descent and Hazards

The skies are hardly ever clear. Along the flight path, various elements appear that can either boost the player's rating or too soon end the run. These can include favorable tailwinds, fuel increases, storm clouds, or abrupt elevation drops.

Cashing Out

The specifying mechanic of Avia Masters is the element of risk versus benefit. Gamers need to choose the ideal minute to "squander" or secure their progress. Wait too long, and an abrupt risk might crash the aircraft, leading to a lost round. Money out prematurely, and gamers may lose out on enormous multipliers.

Game Phase Description Gamer Action **Pre-Flight** Setting stakes or preparing the aircraft for launch. Location preliminary specifications or begin the round. **Climb** The aircraft takes off; multipliers start to climb. Screen the flight path and watch the multiplier grow. **Mid-Flight** Navigating risks, collecting bonus offers, and assessing risk. Choose whether to hold on or secure the present rating. **Resolution** The flight ends either by means of a successful cash-out or a crash. Gather rewards and get ready for the next round.
