When a player "opens" a case, the video game random-ly chooses a skin from a predefined pool, assigning it a rarity tier (Blue, Purple, Pink, Red, or Gold). The result is determined by a provably reasonable algorithm that uses the case's drop-rate table, ensuring openness for the whole neighborhood.

2. How Case Opening Works (Step-by-Step)

1. **Acquire a case**-- Buy it from the "Items" menu or get it as a drop after a match.
2. **Purchase a key**-- Each case needs a specific key (e.g., "Case Key"). Keys are offered for real-world cash or can be earned through in-game achievements.
3. **Open the user interface**-- Click "Open Case" in the inventory, select the case and secret, then confirm.
4. **Watch the animation**-- The screen displays a spinning wheel that lands on a random product.
5. **Receive the skin**-- The product is contributed to the gamer's inventory, where it can be kept, traded, or sold on the Steam Community Market.

Tip: Players can likewise utilize the "Quick Open" function to avoid the animation if they intend to open numerous cases in quick succession.
