- **The Gambler's Fallacy in RPS:** Players often presume that if Rock has appeared 3 times in a row, Paper is "due." In RNG games, this is a fallacy, however versus human or improperly coded bot opponents, tracking historical frequencies can offer an edge.
- **Bankroll Management:** Because casino RPS relocations at a blistering speed, it is easy to misplace money and time. Setting rigorous loss limits and session caps is vital for long-term survival.
- **Avoiding Predictable Openers:** Statistically, casual players throw Rock as their opening move more often than Paper or Scissors since of the mental association with strength. Exploiting this tendency can protect early round wins.
