

The 3 Greatest Moments In Counter Strike 2 Case Opening History

The Ultimate Guide to Counter-Strike 2 Case Opening

Counter-Strike 2 (CS2) has actually taken the iconic tactical-shooter franchise to a brand-new level, and one of the most talked-about features is the case-opening system. For both veterans who keep in mind the initial CS: GO loot boxes and newcomers curious about the mechanic, comprehending how case opening works, what the different cases contain, and how to approach the procedure responsibly can make the experience more pleasurable-- and possibly more satisfying. This guide strolls through the whole process, presents a clear breakdown of case odds, highlights the most valuable items, and answers one of the most regularly asked questions.

What Is Case Opening in CS2?

In CS2, a "case" is a locked container that players can acquire or get as a drop. When opened, the case randomly yields a weapon skin, sticker label, or other cosmetic item. Each case contains a pool of items divided into numerous rarity tiers, and the likelihood of receiving any particular item is governed by a deterministic algorithm that mirrors the one used in CS: GO.

The case-opening UI is integrated directly into the video game's primary menu. Gamers pick a case, select a "key" (a different purchase), and after that click a single button to reveal the contents. The result is revealed with a brief animation, after which the product is included to the gamer's stock and can be traded or offered on the Steam Community Market.

How the Odds Work

CS2's case-opening odds are publicly documented by Valve. The algorithm utilizes a two-step system:

1. **Rarity roll**-- A random number determines which rarity tier will be awarded (e.g., Mil-Spec, Restricted, Classified, Covert, or Rare Special Item).
2. **Item roll**-- Within the chosen rarity, a second random number selects a specific skin.

Because the odds are fixed, the anticipated worth of a case is just the amount of (product price $\times$ likelihood). While this does not guarantee a revenue, it provides a mathematical standard for players who desire to determine long-term costs.

Common Odds (per opening)

Rarity Tier	Approximate Drop Chance
Mil-Spec (Blue)	~ 79.7%
Restricted (Purple)	~ 15.8%
Classified (Pink)	~ 3.2%
Covert (Red)	~ 0.65%
Rare Special Item (Gold)	~ 0.25%

These percentages illustrate why getting a Covert or Rare Special Item is incredibly rare.

Popular Cases and Their Contents

CS2 currently supports a rotating choice of cases, numerous of which were brought over from CS: GO. Below is a succinct table of the most widely used cases, their release duration, and the average market value for a single key.
