Shorter days and falling leaves are a reliable sign that it is time to give your roof some attention. The months ahead bring some of the wettest and windiest weather of the *gutter and roof services Cardiff* year, with driving rain, Atlantic and coastal winds and freeze-thaw cycles all putting pressure on tiles, slates, gutters and flat roofs. Redland Roofing Cardiff is a family-run business that has served Cardiff and South East Wales for over 30 years, and as experienced roofers in Cardiff, we know a few simple checks now can prevent a lot of trouble later. Start with what you can see safely from the ground. Look for slipped, cracked or missing tiles and slates, ridge tiles that look out of line and gaps at the edges of the roof where dry verge or mortar may have worked loose. Check chimney stacks for crumbling brickwork, missing pointing or flashing that has lifted. Gutters deserve particular attention at this time of year, because fallen leaves quickly cause blockages, and water that cannot drain away backs up under the roof edge and into fascias. Inside, a look around the loft for damp patches can be very revealing. Flat roofs need checking too. Rear extensions, dormers and garages with flat roofs are found right across the city, from Splott and Adamstown to Thornhill and Pontprennau. Look for cracked surfaces or joints that have opened up, both common causes of leaks. Traditional felt typically lasts 10 to 15 years, so an older felt roof may be due for replacement before winter really sets in. EPDM rubber, one of our specialities, lasts 25 to 30 years or more, while GRP fibreglass lasts 30 to 40 years. Spotting wear early gives you time to plan rather than react.
