What is the Towers Game?

At its core, Towers is an instant-win multiplier game. Influenced by timeless puzzle mechanics and the ageless "minesweeper" category, the game drops gamers at the base of a multi-tiered tower. The goal is easy: choose a tile on the current level, hope it reveals a safe path (such as a crown, a star, or a clear step), and advance to the next level.

Each effective step increases the player's potential payment. Nevertheless, with every tier climbed, the danger increases. Surprise below one or more of the tiles on each row is a trap (like a bomb or a skull). If a player chooses a trap, the round ends immediately, and their wager is lost.

The appeal lies in player company. Unlike fruit machine where the result is totally passive once the spin button is pushed, Towers permits gamers to determine when to cash out.
