

Lamps and light fixtures can be surprisingly tricky to pack, given their combination of delicate shades, fragile bulbs, and awkward shapes. Manifest Moving Columbus has packed countless lighting fixtures over the years and follows methods designed to prevent crushing or breaking these items during a move.

A Moving Company in Columbus OH experienced with lighting fixtures understands that a few extra minutes of careful packing saves significant frustration once it is time to set up lamps in a new home.

## **Separating Shades from Bases**

Manifest Moving Company recommends removing lampshades from bases before packing, since shades are far more prone to crushing when packed together with heavier base components. Wrapping each shade individually in packing paper protects the delicate fabric or material from bending out of shape.

Storing shades inside slightly larger boxes with extra padding around the edges helps maintain their shape throughout the move.

## **Packing Services for Fragile Lighting Fixtures**

Manifest Moving Columbus offers [packing services](#) that include specialized handling for lamps, lampshades, and other lighting fixtures. Trained packers use appropriate materials to protect these often-overlooked items, reducing the risk of damage that can occur with less careful packing methods.

Manifest Movers in Columbus OH pay close attention to fragile lighting components, understanding that replacement shades or bases can be difficult to match once damaged.

## **Protecting Lamp Bases**

Lamp bases, especially those made of ceramic or glass, need bubble wrap or moving blankets for protection during transport. Columbus OH Movers recommend wrapping the base separately from any attached cords, securing cords with tape to prevent tangling or snagging during the move.

Placing wrapped bases upright in boxes with sturdy padding underneath helps prevent tipping or shifting during transport.

## **Removing Bulbs Before Packing**

Light bulbs should always come out before packing a lamp, since they can break easily and potentially damage the fixture itself. Manifest Movers in Columbus OH recommend packing bulbs separately in a padded container to keep them safe until it is time to set up lamps at the new home.

This small step prevents unnecessary breakage and keeps the lamp base lighter and easier to pack securely.

## Positioning Lamps Within the Truck

Lamps should be placed in a stable, upright position within the truck, away from heavier items that could crush them during transport. Manifest Moving Columbus positions these fragile items carefully, often near the top of the load rather than underneath bulkier furniture.

This careful placement helps ensure lamps arrive intact and ready to brighten up the new home right away.
