How the Game Works: Core Mechanics

To really master the skies, a gamer needs to first understand the foundational mechanics of the game. While specific features can differ somewhat depending upon the particular platform hosting the game, the universal structure stays constant.

The Flight Phase

Once a round begins, the aircraft takes off the runway and begins its climb. As it climbs, a multiplier counter begins ticking upward-- starting at 1.00 x and continuing to rise. The longer the flight continues without event, the higher the multiplier goes.

The Descent and Hazards

The skies are rarely clear. Along the flight course, different aspects appear that can either increase the player's score or too soon end the run. These can include favorable tailwinds, fuel increases, storm clouds, or sudden elevation drops.

Squandering

The defining mechanic of Avia Masters is the component of danger versus reward. Players should choose the optimal moment to "squander" or protect their development. Wait too long, and an unexpected danger might crash the aircraft, resulting in a lost round. Money out too early, and gamers might miss out on huge multipliers.

Game Phase Description Gamer Action **Pre-Flight** Setting stakes or preparing the airplane for launch. Place preliminary criteria or begin the round. **Ascent** The plane removes; multipliers begin to climb up. Monitor the flight path and enjoy the multiplier grow. **Mid-Flight** Browsing risks, gathering bonus offers, and evaluating risk. Decide whether to hold on or protect the current rating. **Resolution** The flight ends either through an effective cash-out or a crash. Gather rewards and prepare for the next round.
