Gamers exist with a grid (generally 3x3, 5x5, or bigger) filled with concealed tiles. Behind these tiles lie either multipliers (representing a win) or mines (representing an overall loss of the existing round's stake).

The game is popular mostly because of its transparency and the "Provably Fair" technology that underpins it. This allows players to validate that the result of every round was identified by a random seed, instead of being manipulated by the house.

Core Mechanics

- **The Multiplier:** As the gamer clears tiles without hitting a mine, the prospective payout boosts.
- **Squander:** The player can stop at any time and collect their cumulative incomes, including a layer of tactical decision-making that pure luck-based video games do not have.

Comprehending the Odds and Risk Management
